Notice of Starting Sales of Electricity at two Small Wind Power Plants in Shimokita-gun, Aomori Pref.

Please be informed that our two small wind power plants built in Shimokita-gun, Aomori Pref. (19.8kW/plant) started sales of electricity, among four small wind power plants released with "Notice on Acquisition of the Fixed Asset (Small Wind Power Plant) by Conclusion of Installment-sales Agreement" dated July 23, 2018.

The small wind power plants that started sales of electricity this time are the plants among 50 sites whose power selling rights have been already acquired. They are located in northern Tohoku region where wind condition is comparatively favorable, and we expect they lead to acceleration for spreading and expansion of our projects of small wind power plants. We will also make announcement when the rest of two plants started sales of electricity.

Our group will aim at higher profitability by building and managing power plants that utilizes renewable energies and proceed with activities for spread and promotion for environmentally-friendly renewable energies and lower environmental burdens also after this.

1. Specifications of windmill equipment

| | |
|------------------------|-----------|
| (1) Windmill | HY Energy |
| (2) Maximum output | 19.8kW |
| (3) Rated wind speed | 9.0m/s |
| (4) Cut-in wind speed | 3m/s |
| (5) Cut-out wind speed | 25m/s |
| (6) Height | 20m |
| (7) Rotor diameter | 15.6m |

2. Future outlook

Influence to our business results in this consolidated fiscal year is negligible.
