Notice on Commencement of Interconnection of Small Wind Power Generation Business

We have obtained power selling right of 50 small wind power plants and proceeded with construction as we announced in the “Notice on Acquirement of Power Selling Right Concerning Small Wind Power Generation Business” dated February 23, 2018.

Please be informed herein that totally 6 small wind power plants have been interconnected.

1. Overview

As we announced in the “Notice on Acquirement of Power Selling Right Concerning Small Wind Power Generation Business” dated February 23, 2018, we have obtained power selling right of 50 small wind power plants for the fixed purchase price of 55 yen/kWh for 20 years in Hokkaido where the wind conditions are good and proceeded with construction of the plants, and totally 16 plants are already in operation and totally five small wind power plants have been just newly interconnected. Furthermore, 6 plants are already in operation for another project and 1 small wind power plant has been newly interconnected. These help us stably gain power-selling income. Among 50 plants in Hokkaido, totally 21 plants are in operation and seven more plants are now in operation for another project. We will promote construction of the plants for the selling right owned by us and inform you as necessary.

We will continue to put our efforts to ESG activities and SDGs to contribute to realization of the “decarbonized society.”

2. Future perspective

The specific impact on our consolidated performance of the term ending March 2022 is minor. We will immediately inform you of any event that may give any material impact to our consolidated performance, etc.
