Notice on Order Receipt of Development Contract Products in the Public and Social Infrastructure Field

Our subsidiary, Tamagawa Electronics, Co., Ltd., (hereafter “Tamagawa Electronics”) have been engaged in enhancement of order receipt in the public and social infrastructure field to aim for further expansion of its business. As a result, we have received an order of the “optical DAS system for airport MCA” (hereafter “Optical DAS System”) for the Kansai International Airport from Nippon Airport Radio Services, Co., Ltd. The “Optical DAS System” for the Kansai International Airport will be launched for operation in April, 2022.

As for actual adoption of the “Optical DAS System,” it was launched for operation at the Narita International Airport in 2016 via development and manufacturing contract from Nippon Airport Radio Services, Co., Ltd.

1. Overview of Optical DAS System

The Optical DAS System manufactured by Tamagawa Electronics is the system which is mainly installed inside the building to provide radio wave for airport services throughout each floor and to accommodate radio to the areas of no communication. Its special feature is scalability of the unit itself and it can easily expand the radio area. It can also be operated with the monitoring application via ethernet to monitor the equipment in operation and to alert those registered via email upon occurrence of abnormality.

2. Future prospective

Tamagawa Electronics will cooperate with Nippon Airport Radio Services, Co., Ltd. for further sales expansion of the Optical DAS System for post-Covid performance recovery of the aviation industry. This case has no effect on our group’s current performance.

We will disclose any effect on the performance after next period as soon as revealed.
